CARLO ERBA

REAGENTS
Quality since 1853

Carlo Erba as a supplier for everything to do with your laboratory: from consumables and laboratory chemicals to life science products and laboratory equipment .

Biolife Italiana

Microbiology, Culture Media, Chromagenic Media, Latex Validation Kits Ready-made Plate and Tube Media

Types of lab chemicals include acids, solvents, reagents, and more. Avantor offers chemical supplies and equipment from leading laboratory chemical suppliers.

CITOTEST®

► Citotest is a leading manufacturer of laboratory consumables in Turkey. The company offers a wide range of products, including; pipettes, lab glassware, lab equipment and reagents.

LP ITALIANA

► Italian origin LP Italiana laboratory plastic materials and glass products.

ISOLAB

- Laboratory Glass Products
- General Laboratory tools and equipment
- Filter Papers
- Clinical Laboratory Products

ERTICK INSTRUMENTS

As Ertick, we provide all the device needs of food and industrial laboratories

WTW is a German-based manufacturer of scientific instruments. Sinanson Labmarket is the top-selling authorized dealer in Turkey.

PH METER MODELS

pH 3110 Portable pH Meter Inolab pH 7110 Tabletop pH Meter

CONDUCTIVITY METER MODELS

Cond 3110 Portable Conductivity Meter Inolab Cond 7110 Tabletop Conductivity Meter

OXYGEN METER MODELS

Oxi 3205 Portable Oxygen Meter

MULTIPARAMETER MODELS

inoLab® Multi 9310 Multiparameter Meter Multi 3320 Multiparameter Meter

DIGITAL MULTIPARAMETER MODELS

Multi 3510 IDS Digital Multiparameter Meter Multi 3620 IDS Digital Multiparameter Meter Multi 3630 IDS Digital Multiparameter Meter

BOI / BOD MODELS

OxiTop®-i IS 6 BOD measuring device with 6 measuring units

TURBIDIMETER MODELS

Turb 355 IR Portable turbidity meter

PHOTOMETER MODELS

pFotoFlex® STD Portable photometer with 6 wavelength LED filter.

► Italian-made pH meters, conductivity meters, multiparameter meters, dissolved oxygen meters, Swiss-made electrodes and probes that can be safely used in industrial and food businesses. NIST and DakkS certified precise calibration solutions

pH METER MODELS

PH 8
Portable, computer-connectable pH meter and ORP meter with memory

PH 80
Benchtop digital microprocessor-based pH meter and ionometer

PH 7
Professional portable pH meter with high-resolution color display

PH 70
Portable, computer-connectable pH meter and ORP meter with memory

CONDUCTIVITY METER MODELS

COND 80
Digital microprocessor with large backlit color graphic display. Automatic scale switching, automatic and manual temperature compensation

COND 8
Benchtop digital microprocessor conductivity meter with large backlit color graphic display

OXYGEN METER MODELS

OXY 7 Vio
Dissolved oxygen measurement, % saturation and barometric pressure with temperature indicator

OXY 70 Vio
Dissolved oxygen measurement, % saturation and barometric pressure with temperature indicator. Manual and automatic data logger with the ability to download data to PC via micro USB

MULTIPARAMETER MODELS

REVio
Professional, portable, pH, mV, ORP, ISE, conductivity, TDS, salinity, resistivity, dissolved oxygen and temperature measurement.

TESTERS

PH 1
XS pH 1 Pocket Type pH Meter, Italy production, IP67 protection class pH meter with automatic temperature compensation feature

COND 1
IP67 waterproof pocket type conductivity meter for conductivity and TDS measurement

PH 5
IP67 waterproof, portable pH meter. Resolution 0.01 pH. With microprocessor and maximum duration interchangeable electrode.

ELECTRODES

2 Pore F
Sharp spear-tipped, Plastic (PEEK) and glass

2 Pore K
Replaceable bladed steel body

2 Pore T
Glass body
2 Pore Steel T
Steel body
Polymer Plast: unbreakable epoxy body

Standart
BNC-plug combined electrode

pH

BUTYROMETERS

- 0 - 8% Milk Butyrometers
- 0 - 40% Cheese Butyrometers
- 50 - 75% Cream Butyrometers
- 70 - 90% Butter Butyrometers
- 0 - 100% Food Butyrometers
- Butyrometers stoppers, beakers, pipettes, and tools

MULTIPURPOSE GERBER CENTRIFUGE MODEL SUPERVARIO-N

Order Code : 3680

- Stainless steel outer body
- Programmable speed: 600 to 1130
- Programmable temperature: 68 degrees
- Programmable time: 1 to 99 minutes
- Can be used for solubility test of milk powder

NOVA SAFETY MODEL GERBER CENTRIFUGE

Order Code : 3670

- Order Code: 3670
- 8 buret capacity
- Automatic braking and lid locking system
- 1350 rpm centrifuge suitable for Gerber method
- Electronic timer
- Durable German technology

CRYOSTAR1: MILK FREEZING POINT DETERMINATION

Order Code : 7150

- Milk Freezing Point Determination
- Manual with single sample tube
- Compatible with reference methods ISO/IDF/DIN 5764
- Measures the amount of water added to milk by freezing point

CRYOSTAR AUTOMATIC: MILK FREEZING POINT DETERMINATION

Order Code : 7160

- Can work with multiple tubes thanks to its 12-magazine
- Compatible with reference methods ISO/IDF/DIN 5764
- Measures the amount of water added to milk by freezing point

COLONY COUNTER

Order Code : 8550

- Easy to count colonies in Petri dishes suitable for microbiology laboratories
- Automatic counter and marking with each pen stroke
- High quality, durable, and economical
- Includes apparatus for working with small Petri dishes
- 2 transparent and black checkered glass

GERBER WATER BATH WB-436 ANALOG

- 17 liters with 36 buret capacity

GERBER WATER BATH WB-436 DIGITAL

- 36 buret capacity

LACTOSTAR : RAPID MILK ANALYSIS DEVICE

Order Code : 3510

- Quick multi-parameter measurement for all types of raw milk (cow, sheep, goat, etc.)
- Fat: 0.00-40.00%
- Protein: 0.00-10.00%
- Lactose: 0.00-10.00%
- Fat-free dry matter: 0.00-15.00%
- Minerals: 0.00-5.00%
- Calculates density, freezing point, and added water
- Turkish menu language option
- Automatic cleaning

Milkotester is a Bulgarian manufacturer of milk analysis devices. It produces high-performance devices for rapid milk analysis, especially in milk collection centers.

Master ECO

- Measures 9 parameters.
- Printer is external

Master Classic LM3

- Measures 10 parameters
- Has an internal printer
- Has an integrated database memory

Lactomat Rapid S

- Measures 10 parameters
- Has an internal printer
- Has an integrated database memory

Master PRO Touch

- Measures 11 parameters
- Has an internal printer
- Has an integrated database memory
- Can control all measurements on the screen with its touchscreen without connecting to a computer

Master Classic LM2

- Measures 10 parameters
- Has an internal printer
- Is a standard portable model

Master PRO

- Measures 11 parameters
- Has an internal printer
- Has an integrated database memory

ATAGO®

► Handheld - Abbe Type, Digital Refractometers

TwinSensor

► Milk antibiotic residue test

LACTOSCAN

ULTRASONIC MILKANALYZER

► Somatic Cell Counter in Milk

► Digital Flu Orange Direct counting by microscopy method

BIOEASY

► Includes rapid test kits and tools for the detection of antibiotics, aflatoxins, pesticides, and other food residues. It produces tools that will ensure food safety in areas such as milk, meat and seafood, feed and grain products, etc.

ONDA SPECTROPHOTOMETER V-10 PLUS (VIS): Visible spectrophotometer with automatic wavelength adjustment

VIS ONDA V-11 SCAN: 320 - 1100 nm range, 5" touch color screen, 4 nm passband, single beam, Tungsten source, USB flash memory, multi-language operating system.

ARGOLAB ICF 200 FORCED CIRCULATION INCUBATOR, PLUS VERSION: Operating range: 5 °C above ambient temperature up to 80 °C. Net volume 200 liters. Temperature variation at 37°C: ± 0.3°C, uniformity of temperature at 37°C: ± 0.4°C. Stainless steel door with large glass window.

ARGOLAB FRIDGE FR 260 G: Professional refrigerator for laboratory use

DIGITAL ULTRASONIC BATH MOD. DU-06: Digital ultrasonic cleaner, maximum capacity 0.6 Lt, without heating, with timer 180/360 sec. Built-in stainless mesh basket, stainless cover.

MULTISPIN 12: Ultra-compact mini-centrifuge, equipped with silent induction motor and maintenance free; speed: adjustable from 1000 to 12,000 rpm with steps of 1000 in 1000 rpm

NEYA 8 BASIC: Max load capacity: 4x175 ml
Maximum speed: 6000 rpm
Ventilated centrifuge with automatic rotor detection, check of presence of accessories and of allowed max. speed.

NEYA 10 PROFESSIONAL: Max load capacity: 4x175 ml
Maximum speed: 6000 rpm
Ventilated centrifuge with automatic rotor detection, check of presence of accessories and of allowed max. speed.

TEMP 7 VIO: Portable thermometer, for thermocouple K/T probes, with backlit color display. Recording of Min and Max values, measure stability indicator.

TEMP 70 VIO: GLP portable thermometer, with double channel for PT 100 probes. Innovative high resolution color display, excellent readability in all light conditions.

90mm Ready To Use Medium

- It is our most preferred product group. •
- It has a completely sterile structure.

60mm Rodac Medium

- There are horizontal and vertical lines on the medium to easily count the bacterial colonies planted on it.
- It is mostly used to monitor environmental and surface hygiene.

Ready To Use Tube Medium

- Our most common medium volume is in 10 mL and 5 mL sterile Polycarbonate (PC) tubes.
- We have 5mL or 10mL varieties.
- In many forms, semi-solid, oblique form, etc. We have many varieties available.

Transport Medium

SARS-CoV-2 Rapid Antigen Test:

Reliable, rapid chromatographic assay for the qualitative detection of specific SARS, CoV-2 antigens found in the human nasopharynx.

Amies Transport Swab:

Laborlar Biotechnology Amies Agar Gel Transport Swabs enable the transportation of samples taken from throat, vaginal, wound and skin with swabs.

► Brand Scientific Equipment is a leading provider of scientific equipment and supplies for many type industry lab.

Micropipette Tips

Digital Dispenser Models

Digital Burette Models

Automatic Micropipettes

► With a range of more than a thousand different weather and measuring instruments, TFA Dostmann GmbH & Co. KG is one of the leading companies in the industry in Europe

30.1018
Digital Food Type Thermometer

30.1040
Digital probe thermometer

30.5002
Digital Thermohygrometer

38.2013
Digital timer and stopwatch

► is the first French manufacturer of measuring instruments for laboratories, research and industry. Main Products is Viscometer.

► Brookfield has a reputation of being the world leader in viscosity measurements for over 80 years providing a variety of laboratory viscometers to suit a wide variety of applications.

► Glass-fiber for AKM device and membrane filter papers for Microbiology, filtration equipment, Separation products

► GVS Nylon Filtration Membrane is a supported, naturally hydrophilic membrane designed to wet out evenly and retain its superior strength during use in laboratory

kikkoman
seasoning your life

▶ Lumitester Smart is a portable luminometer for ATP test. The ATP Test (Kikkoman A3) provides easy inspection for cleanliness levels by using LuciPac.

hygiena™

▶ EnSURE® Touch is an advanced cleaning verification and monitoring system that collects, analyzes and reports data from various test devices so you can prove the effectiveness of your cleaning programs.

OHAUS®

▶ OHAUS has been producing safe, precise, and reliable scales, analytical instruments, and laboratory equipment since Gustav and Karl Ohaus founded the company in 1907.

METTLER TOLEDO

▶ Mettler Toledo precision instruments are the foundation of research and quality control labs all over the world. High-performance weighing solutions offer a basis for solid R&D results.

**ASTORI
TECNICA**

OsmoSpecial 1 Osmometer
OsmoSpecial 1 is a single-sample semiautomatic osmometer for the rapid determination of the cryoscopic point variation (osmolality) in biological and pharmaceutical liquid samples.

OsmoTouch 20 Osmometer
OsmoTouch 20 is an automatic osmometer with a 20-place carousel-based autosampler for the rapid determination of the cryoscopic point variation (osmolality) in biological fluids, pharmaceutical samples and other solutions.

OH Glasschem Distillers
The determination of alcohol percentage in wine and liquors is one of the most frequent and important analysis in oenology.

BL Smart Lab Blender
The BL Smart time-programmable Lab Blender is particularly suitable to the treatment of food and environmental samples prior to their microbiological analysis

► Founded in 1968, NÜVE is one of the world's leading laboratory and sterilization equipment manufacturers.

NC 100 VERTICAL TYPE STEAM STERILIZER

NF 400 TABLE-TOP CENTRIFUGES

EN 120 STAINLESS STEEL CELL OVEN

LN 120 LAMINAR AIR CABINS

► Established in 1983 by Ermete Passoni, VELP Scientifica is today one of the world's leading manufacturer of analytical instruments and laboratory equipment

AutoKjel Autosampler - Automatic Kjeldahl Nitrogen Protein Analyzer

SER 158 Series Automatic Solvent Extractor

AREX 6 Connect PRO Hot Plate Stirrer

OHS 20 Digital Overhead Stirrer

► DLAB has been a leading supplier of high quality laboratory equipment. DLAB Scientific has its corporate offices in China and also established subsidiaries in United States, Europe and India to enhance its business operations along with the expansion of its warehouse distribution.

► Four E'S focused on providing Laboratories worldwide with high-quality instruments & supplies, thereby furthering Scientific Research.

► Elektro-mag, founded and established with native fund, actively operates in the laboratory, medical and industrial sectors since 1968 and with customers worldwide, Elektro-mag shares a favorable reputation in both Turkish and international market place complete with over four-hundred distributors.

► WITT offers specific devices and systems for the mixing, metering and analysing of gases for every type of packaging machine that is used in the food industry.

Microbiological Safety Cabinets

Class II Microbiological safety cabinets for operator, environment and product; It provides first-class protection against aerosols produced by potentially risky or risky microorganisms in the cabin.

Laminar Air Cabins

Air Cabins are designed for product protection in applications made with samples that are harmless to humans and the environment in a particle-free environment. Non-pathogenic samples are an ideal solution for cell and tissue culture studies.

Climatic Test Cabin

Thanks to its wide temperature and humidity control range, it allows many products to be tested in different climatic conditions, and stability, artificial aging and storage tests can also be easily performed.

Fume Hood

The devices have a suction power that can remove gases such as acid vapor, heat and process aroma that occur in the working area, and have a structure that discharges them to the external environment through the chimney connection connected to the system.

We provide complete installation services for your laboratories. Laboratory benches and all systemic installation services are provided by us.

Our company is a visionary laboratory services company established with the aim of providing the laboratory services you need to fill an important gap in the sector. Services and products are sold at various levels of the laboratory world in order to provide you with the most reliable and fastest service with its expert staff and modern infrastructure.
